

NEWFOUNDLAND AND LABRADOR

AQUACULTURE INDUSTRY INFORMATION

The Department of Fisheries and Aquaculture strives to provide the public with accurate information on the provincial aquaculture industry. This section provides access to information on topics associated with sustainable aquaculture management in Newfoundland and Labrador.

Please click on the tiles below to find out more information on a variety of topics related to aquaculture production and management.

As part of our continued commitment to openness and transparency, the Government of Newfoundland and Labrador provides citizens of the province with access to information about completed requests made under the [Access to Information and Protection of Privacy Act](#) (ATIPPA). Since January 1, 2013, the [Access to Information and Protection of Privacy Office](#) provides an [online summary](#) of the information requested and responded to by core government departments. Responses will be published on the [ATIPPA website](#) following a 72-hour period after the response is sent electronically to the applicant, or five (5) days in the case where the records are mailed to the applicant.
